

# Grouphead Angled Brush with detergent Scoop

The grouphead brush, also known as a grouphead cleaning brush, is a specialized tool designed to clean the grouphead of an espresso machine. The grouphead is a crucial component where the portafilter (coffee holder) is attached, allowing hot, high-pressure water to pass through and extract coffee.

# Coffee Espresso Brush with Water Deflection Fins

Our coffee brushes with water deflection fins are specialized tools designed for cleaning coffee equipment, particularly those with intricate surfaces or parts where water and coffee residue can accumulate. The advantage of these brushes, equipped with water deflection fins, can be summarized as follows:

- **Enhanced Cleaning Efficiency:** The fins on the brush help to direct water flow, ensuring that it reaches and effectively cleans hard-to-reach areas
- **Improved Water Distribution:** By deflecting water, the fins ensure that the water is spread evenly across the surface being cleaned
- **Reduced Water Waste:** This can help to reduce water waste and make the cleaning process more environmentally friendly
- **Enhanced Durability and Longevity:** By distributing water evenly and reducing the likelihood of excessive pressure on any one area, the brush is likely to last longer and perform better over time
- **Ease of Use:** The fins can help to guide the brush along the contours of the coffee equipment, making it simpler to reach and clean all areas

# Espresso Grouphead Cleaning Brush

## Models

Always found it hard to clean your grouphead with those nylon bristles which tend to get sticky over time if you don't clean the coffee oil off?

This tool is shaped like your coffee machine portafilter and works exactly the same way too - except it cleans!

Instructions to use:

- 1) Scoop some espresso cleaner powder or use one sachet of puly caff and pour it on top of the white silicon
- 2) Fit your brush into the grouphead through the same grooves where your portafilter fits into
- 3) Swing the handle from left to right to clean the grouphead
- 4) Enjoy your spanking clean grouphead free from coffee oil!

Net weight	5.4kg
Gross weight	6.1kg

Though it may be simple to look at, this espresso knock box has a unique knock-pad at the top of the front column, which in place of a horizontal bar, giving it sturdy knockability in a lightweight package that was super easy to clean.

While thick rubber padding added to shock absorption, so did soft PE pad at the bottom and overall design. Surprisingly, the lightweight plastic espresso knock box had the best shock absorption due to its rubber-coated knock pad and column. By situating the rubber pad on top of a vertical column instead of a horizontal bar, the entire impact is absorbed in the base.
